📦 Node.js | React.js | TypeScript | JavaScript | Express.js | MongoDB | PostgreSQL | Redis | Docker | AWS

Profile Summary

Full Stack Software Engineer with **5+ years of experience** building scalable web applications using Node.js, Express.js, React.js, JavaScript, and TypeScript. Experienced in designing REST APIs, developing responsive user interfaces, integrating third-party services, optimizing application performance, and working with SQL and NoSQL databases. Comfortable taking ownership of features from design through deployment while collaborating with cross-functional teams in Agile environments. **Immediate joiner.**

Skills

Libraries & Frameworks — JavaScript, TypeScript, Node.js, Express.js, React.js, Redux Toolkit

Database Knowledge — MongoDB, MySQL, PostgreSQL, Redis

API Development & Integration — REST API, GraphQL, OAuth, JWT, Swagger (OpenAPI), Swagger UI

Payment Gateway Integration — Stripe, Paypal, In-App-Purchase

Tools & Technology — Git, GitHub, GitLab, VS Code, pgAdmin, MySQL Workbench

DevOps & Cloud — Docker, Docker Compose, AWS EC2, AWS S3, Domain Hosting & Management, SSL

AI & Tools — Copilot, Gemini, ChatGPT, Claude, LLMs, RAG

Professional Experience

Senior Software Engineer, GlobalLogic Pvt Ltd. 🔗 02/2025 – Present | Pune, India

- Work on backend services in Node.js using clean architecture and secure coding practices, and also contribute to internal React admin dashboards used by other teams.
- Built and maintained a shared React component library integrated with REST APIs. Used Redux for global state management and React Query for server state, making data loading noticeably faster.
- Added Redis caching and optimized slow database queries, reducing average API response time by 35% and database load by approximately 40%.
- Built a RAG-based AI chatbot with a Node.js backend, LangChain orchestration, and a React frontend. Implemented document ingestion, hybrid vector search, and a streaming chat interface.
- Added retry and idempotency logic to critical payment and data write flows, preventing duplicate operations and improving production reliability.
- Work closely with QA, DevOps, and product teams, owning features from requirements through deployment, including production support and incident triage.
- Investigate production issues by analyzing backend logs and tracing frontend API calls to identify root causes instead of applying temporary fixes.
- Deployed and monitored applications on AWS EC2, handling instance configuration, SSL setup, and uptime management to ensure reliable system operations.

Senior Software Engineer, Iroid Solutions 🔗 02/2021 – 10/2024 | Surat, India

- Worked across 6+ projects in different domains, including Finance, Stock Prediction, Service Marketplace, EdTech, and Social Media, each with unique business requirements.
- Built REST APIs using Node.js and Express.js, and integrated them with React frontends. Implemented routing, protected routes, and JWT-based authentication across both frontend and backend.
- Developed real-time features such as live notifications, chat, and status updates using Socket.IO. Integrated WebSocket listeners into React applications while keeping application state synchronized.
- Integrated Stripe, PayPal, and In-App Purchase on the backend, including webhooks and idempotency handling, and implemented payment UI, loading states, and error handling on the frontend.
- Managed production deployments on AWS EC2, including SSL configuration, server setup, and environment management.

- Improved application performance by profiling slow database queries, reducing unnecessary React re-renders, and optimizing overall page load times.

Software Engineer, Crystal Infotech

02/2021 – 01/2022 | Surat, India

- Built RESTful APIs using Node.js and Express, then integrated them into React frontends.
- Converted Figma and XD designs into working React pages — handled component structure, routing, and form validation.
- Followed Git-based workflows, participated in code reviews, and got exposure to basic CI/CD pipelines.

Education

M.Sc CS, Shree Ramkrishna Institute of Computer Education
and Applied Science

2020 – 2022 | Surat, India
